

# THE COUSINS

**Real life Cousins, Harland Williams and Kevin Hearn, have been writing songs and making music their whole lives.**

**Ever since they were kids these two black sheep of the family found common ground with music and song writing as they grew up in the suburbs of Toronto, Canada.**

**As they grew older Harland went off to pursue a successful career in stand up comedy, TV, film, and voice work in Hollywood. Harland has starred in classic comedy films such as Dumb and Dumber, Half Baked, Rocketman, Something about Mary, and the list goes on. Currently Harland is a Producer on his own animated show he created for Disney called, 'Puppy Dog Pals.'**

**After years with the eccentric rock band The Look People, Kevin moved on and became a member of the world famous Barenaked Ladies rock band. This gig led to an introduction to one of his childhood musical hero's the late great Lou Reed. After striking a friendship, Lou asked Kevin to become his bandleader for the remainder of his life**

**Despite their busy careers, Harland and Kevin always seemed to find the time to come together and make more music. Eventually they had created so many wonderful songs they decided they needed to be heard by the world. So, their first, real studio album, RATTLESNAKE LOVE, was born.**

**An eclectic album with songs that range from sexy to absurd, from heartfelt to hilarious. It's been a long time coming but The Cousins are finally here!**
